

Silviu Nica Artist Statement

My work has a rather organic feel. In it I explore the idea of metamorphosis, the transformation of shapes and elements. By erasing the boundaries between them, I project the subject into a surrealistic realm. I am drawn to the human shapes and natural elements, that I use almost consistently to deconstruct and reconstruct images.

I take inspiration from organic structures like roots, rocks, leaves etc. combined with human or animal shapes recreating sometimes new structures. It is basically saying that we are one with the natural world surrounding us. Like (French chemist) Antoine Lavoisier brilliantly summarized it: "In nature, nothing is created, nothing is lost, everything changes."
